

# Potholing Performance that Pays Off!

Cut potholing costs without cutting the cable. VACMASTERS' air-vacuum excavation systems save you money by potholing faster, safer, and cleaner.

## VACMASTERS Air-Vacuum Excavation Systems

Hundreds of companies around the world can attest to the benefits of potholing with VACMASTERS. There's no better time than now to make the investment to transition from water to air.

**SYSTEM 4000**  
*Our largest and most powerful, digs in all soil conditions.*

Like the balloon, the pressure builds until the fissures explode, crumbling the soil for easy, dry vacuuming and backfilling. It's a simple concept with outstanding results.

Studies have shown that potholing with water, even at its lower pressures, can damage exposed utilities in only a few seconds because it doesn't compress when it hits the utility. Air, being a gas, will compress and flow

**SYSTEM 3000**  
*Powerful, compact and maneuverable*

**SYSTEM 1000**  
*Affordable, trailer, truck, or skid mounted*

around a solid, non-porous cable or utility and harmlessly dissipate in the hole. Plus, air is non-conductive.

There's a VACMASTERS air-vacuum excavation system designed to do your jobs, big or small, and all have water on board as a backup. See our demo online at [www.vacmasters.com](http://www.vacmasters.com) or call or e-mail us.
