

Now you can pothole with air..

without digging a hole in your pocket!

VACMASTERS SYSTEM 1000

LOW COST • SMALL SIZE • HIGH PERFORMANCE

VACMASTERS, the leader in Air-Vacuum Excavation, has made potholing with air more affordable than ever. The **VACMASTERS SYSTEM 1000**...*Big in Performance...Small in Size and Cost.* The trailer or truck mounted SYSTEM 1000 enables the operator to select either air or water to meet ALL the various job conditions that may be encountered. The SYSTEM 1000 will allow you to dig effectively and much more safely in ALL soil types while greatly reducing mud hauling and disposal costs.

Compared to water, the VACMASTERS SYSTEM 1000 using air is:

- **faster** – pothole in most soils in 7–8 minutes
- **efficient** – spoils stay dry for backfilling
- **economical** – eliminates mud hauling and disposal costs
- **safer** – for operator and costly buried utilities
- **DOT friendly** – won't harm road base.

Join the VACMASTERS Air Force. Now's the time to stop wallowing in the mud and start potholing with air power.

To see VACMASTERS air in action, view our demo at www.vacmasters.com or for more information, call 1-800-466-7825 or e-mail us.
